## Personal Projects

### Restaurant Website

- Developed a responsive front-end for a restaurant website using React.js, Tailwind CSS, and GSAP (GreenSock Animation Platform), enhancing visual appeal and user interaction.
- Utilized Tailwind CSS's utility-first approach for efficient styling and responsiveness across various devices and screen sizes.
- Employed React Router for smooth navigation and optimized routing.

### Student Rooms Website

- Implemented the front-end using HTML, JavaScript, and Tailwind CSS, ensuring a streamlined development process and consistent styling across the site.
- Integrated JavaScript for dynamic functionality, such as interactive room listings, filtering options, and real-time availability updates.
- Ensured cross-device compatibility and responsive design principles.

### Movie site

- Designed and developed a movie site
- Developed the front-end of the website using HTML, CSS, and JavaScript, ensuring an intuitive and visually appealing interface.
- Styled the website with CSS, prioritizing a modern and clean design to enhance user engagement.
- Integrated a third-party Movie Database API to enrich the website with up-to-date movie information.

## Experience

### Freelance Front End Web Developer

- I proactively identified businesses in need of a digital presence and successfully developed tailored websites to meet their requirements.
- Successfully completed small freelance projects for clients, on Upwork using modern web technologies, including React and Wordpress.

## Technical Skills and Interests

- **Languages:** JavaScript, HTML+CSS, C++
- **Libraries:** ReactJs, C++ STL
